

# ZOHAIB UMER

+92 308 2148607 | umerzohaibumer@gmail.com | Wah Cantt, Pakistan | github.com/imzohaib-web

## SUMMARY

Front-End Web Developer and BS Software Engineering student (Expected 2027) with hands-on experience building scalable, responsive web applications using React and JavaScript. Delivered production-quality projects spanning e-commerce platforms, AI-powered chatbots with LLM API integration, and full-stack systems. Skilled in REST API integration, prompt engineering, and performance optimization. Seeking a software engineering internship or junior developer role to contribute to impactful, large-scale products.

## EXPERIENCE

### Front-End Developer Intern

*Erudite Coaching Center*

Aug 2024 – Dec 2024

*Wah Cantt, Pakistan*

- Built and maintained modular, reusable UI components in React, HTML5, and CSS3 for a live production web application used by students and instructors.
- Implemented pixel-perfect responsive layouts from Figma mockups, achieving cross-browser compatibility across Chrome, Firefox, and Safari.
- Reduced page load time by applying asset compression and lazy-loading, improving performance for low-bandwidth users.
- Participated in Agile sprint cycles, daily standups, and code reviews with senior engineers, shipping features on schedule across 4 months.

## PROJECTS

### AI-Powered Chatbot | *React, JavaScript, LLM API (OpenAI / Anthropic), CSS3*

github.com/imzohaib-web

- Engineered a real-time conversational AI chatbot in React by integrating the Anthropic/OpenAI LLM API, implementing token streaming for low-latency response delivery.
- Designed persistent chat history and a stateful message threading system, maintaining context across multi-turn conversations.
- Applied systematic prompt engineering techniques to optimize model output quality, relevance, and safety guardrails.
- Built a fully accessible, WCAG-compliant UI with keyboard navigation support and ARIA labels.

### E-Commerce Platform | *React, JavaScript (ES6+), REST APIs, CSS3, Context API*

github.com/imzohaib-web

- Developed a full-featured e-commerce web application with product listings, dynamic search/filter, cart management, and checkout using React hooks and functional components.
- Managed complex global application state with React Context API, eliminating prop drilling across 10+ nested components.
- Integrated external REST APIs for live product data fetching with error handling and loading states.
- Delivered mobile-first responsive design across all breakpoints (320px – 1440px), improving usability on mobile devices.

### Library Management System | *Laravel, MySQL, JavaScript, HTML5, CSS3*

github.com/imzohaib-web

- Designed and built a full-stack library portal with user authentication (login/register), book inventory CRUD operations, and borrowing/return tracking.
- Architected RESTful backend APIs in Laravel connected to a normalized MySQL database schema with relational integrity constraints.
- Created a fully responsive front-end with vanilla CSS and JavaScript, without reliance on external UI frameworks.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), Python, Java, C++, HTML5, CSS3

**Frameworks & Libraries:** React, Laravel, Bootstrap, React Context API

**AI / ML:** LLM API Integration (OpenAI, Anthropic), Prompt Engineering

**Databases:** MySQL, REST API Design

**Core CS:** Data Structures, Object-Oriented Programming, Algorithms

**Tools:** Git, GitHub, VS Code, Figma, Apache NetBeans

**Currently Exploring:** TypeScript, Next.js, Tailwind CSS

## EDUCATION

**COMSATS University Islamabad, Wah Campus**

*Bachelor of Science in Software Engineering*

Wah Cantt, Pakistan

*Expected: 2027*

## CERTIFICATIONS

**Prompt Engineering for ChatGPT** – Coursera, 2025    **AI For Everyone** – Coursera, 2025

**Programming for Everybody (Python)** – Coursera, 2025    **Career Essentials in Generative AI** – LinkedIn & Microsoft, 2024
